

## Acknowledgements

It is with great appreciation that I acknowledge the exceptional work performed by the contributing authors, mapping and layout experts. On behalf of Commissioner Lawrence Jasinski and the Department of Parks, Recreation and Forestry, we thank you for exceeding all expectations in submitting a superb work product. Without your professionalism and dedication, this report would not have been possible. In 76 years of Erie County Forest history, this is the first effort to establish a formal Forest Management Plan. The result of months of hard work is a plan which, when implemented, will have a positive impact on the future of Erie County Forests for generations to come.

Yours Truly,

Brian Grassia

## Preface

The purpose of this report is to establish a framework for the process of developing and implementing a forest management plan – *Creating Sustainable Forests in Erie County for the 21<sup>st</sup> Century*.

The Plan and implementation will adhere to the highest standards and guiding principles governing proper forest management practices, and will issue recommendations based on sound biological, economic, recreational, educational, and public safety considerations.
